**Report of Acting Clerk: Damage to Parish CCTV Assets**

The Council's CCTV system covering Brook Parade and the former Volvo garage site has been out of service since 17 November 2025 following building works at both locations. Our contractor has confirmed that builders have cut multiple cables and advised that a complete new installation is likely to be required, subject to a full site survey.

A site survey has been arranged for Tuesday 9 December with the contractor's senior adviser, who has confirmed there will be no charge for this visit. The survey will assess the condition of cameras, recorders, power supplies and cabling, and will provide detailed costs and options for reinstatement of coverage at both sites.

Recommendation: That the Committee notes the damage to Parish CCTV assets and recommends to Full Council that, once the site survey report and quotation have been received, the responsible developers and or their contractors are formally approached to seek full reimbursement or direct rectification of the costs of restoring the system and making all associated power supplies safe.
